

Remote Working Solution

COVID-19 has impacted the lives of people around the world and many businesses are considering every contingency plan to avoid serious disruption of their operations. What is your emergency plan if members of your staff need to self-quarantine? Will they be able to continue to work? Is their workplace enabled for remote working so business critical functions can still be covered?

Remote working is growing steadily in popularity, but many organisations are still in the early stages of adaptation. We expect a surge in remote working in the upcoming months and an increased need for IT Support to set-up a mobile workforce as the Coronavirus will impact business operations.

In an ideal situation, companies would invest in full-blown strategies to enable remote working. However, the current unprecedented and evolving events are calling for a quick, easy to use solution for the time being.

Our solution: Remote access via the RD Gateway (Windows Server)

By using this remote access, you will benefit from:

- ▶ Use your existing infrastructure – no additional hardware, licencing required
- ▶ We are able to set it up for you 100% remotely
- ▶ Quick to install – your remote workplace will be up in running in 2-3 hours
- ▶ Easy to use. (Requires secure access via 2-Factor Authentication with a product such as DUO - \$10 per user, per month)

Your user experience will be based on your bandwidth. If your bandwidth is not business standard, you may need to upgrade your internet provider.

Price: \$660 ex GST Set-up fee*

Get your remote working organised today! Contact us on (07) 3340 5555 or sales@bes.com.au for further information!

Yours faithfully,

The BES IT Systems Team
